***Restriction/Election***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to sequencing or re-sequencing packet, classified in class 370, subclass 394.
  - II. Claim 12, drawn to filter parameters, classified in class 370, subclass 290.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions have different modes of operation, different functions, and they have different effects.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification because of their recognized divergent subject matter, and the search required for each Group I or II is not required for other Group, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Attorney Robert Kinberg, Reg. No. 26,924 on February 20, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is advised that the reply to this requirement is be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
